WHAT TO ORDER

STOCKING FOR THE SEASON

To determine the right size run to order for a style, look at your retail velocity and local demographics. Below is a typical, minimum size run to use as a starting point.

STANDARD SIZE RUN

S		1
M	1	2
L	2	2
XL	2	1

Reminder: Products marked throughout this catalog as “Fall Season Only” will only be available for this season and only available while supplies last.

Consider ordering higher quantities on these products to ensure availability for your customers during Fall/Winter season.

To get the most out of your upcoming order, ensure you have the right mix of products for the Fall/Winter 2025 season.

Your selections directly affect your season’s apparel sales performance, including department profitability and customer satisfaction.

BEFORE YOU ORDER

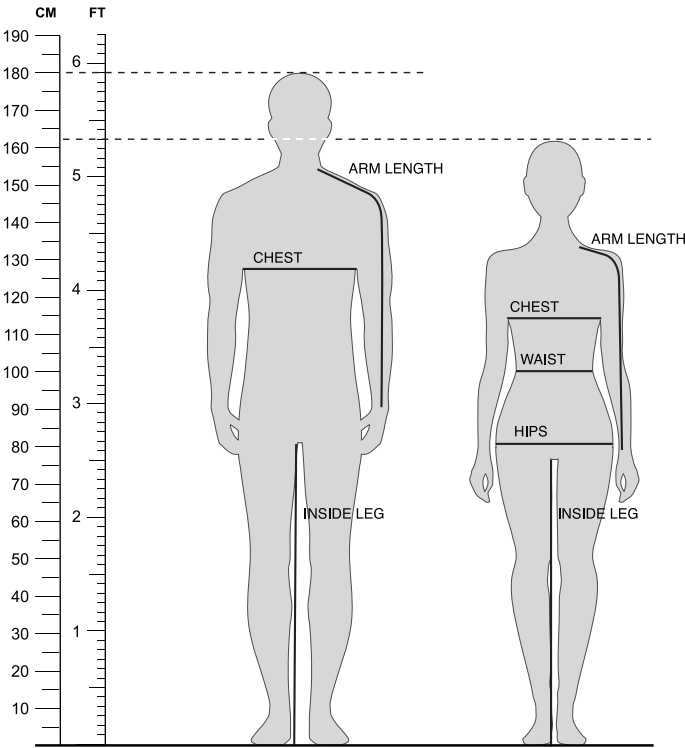

- Consider what budget you have for this collection.
- Your retail space needs to work to its maximum potential. Do not under or over-fill your apparel displays. Focus on fewer styles in greater stock depth, so you have sizes available for customers to purchase.
- This range arrives just prior to the Fall season. Stock the right amount of product to maximize clothing, gear & gift sales, online and in-store. Make sure you introduce the apparel range when selling new or used motorcycles.
- Note which styles are “Final Season” and execute a plan to mark-down and sell-through before these products are aged.
- Consider your demand during events throughout the season, e.g. Open Houses, Annual Sales Events etc.
- Don’t be too conservative. If you believe in a product, you will sell it. You won’t sell anything new if you don’t present anything new to your customers.
- Buy products you like, but make sure you have something for every rider/buyer that comes into your dealership.

If you don’t stock what your customers want, they will go somewhere else to buy their products!
